ONE IF BY LAND, TWO
IF BY SEA...

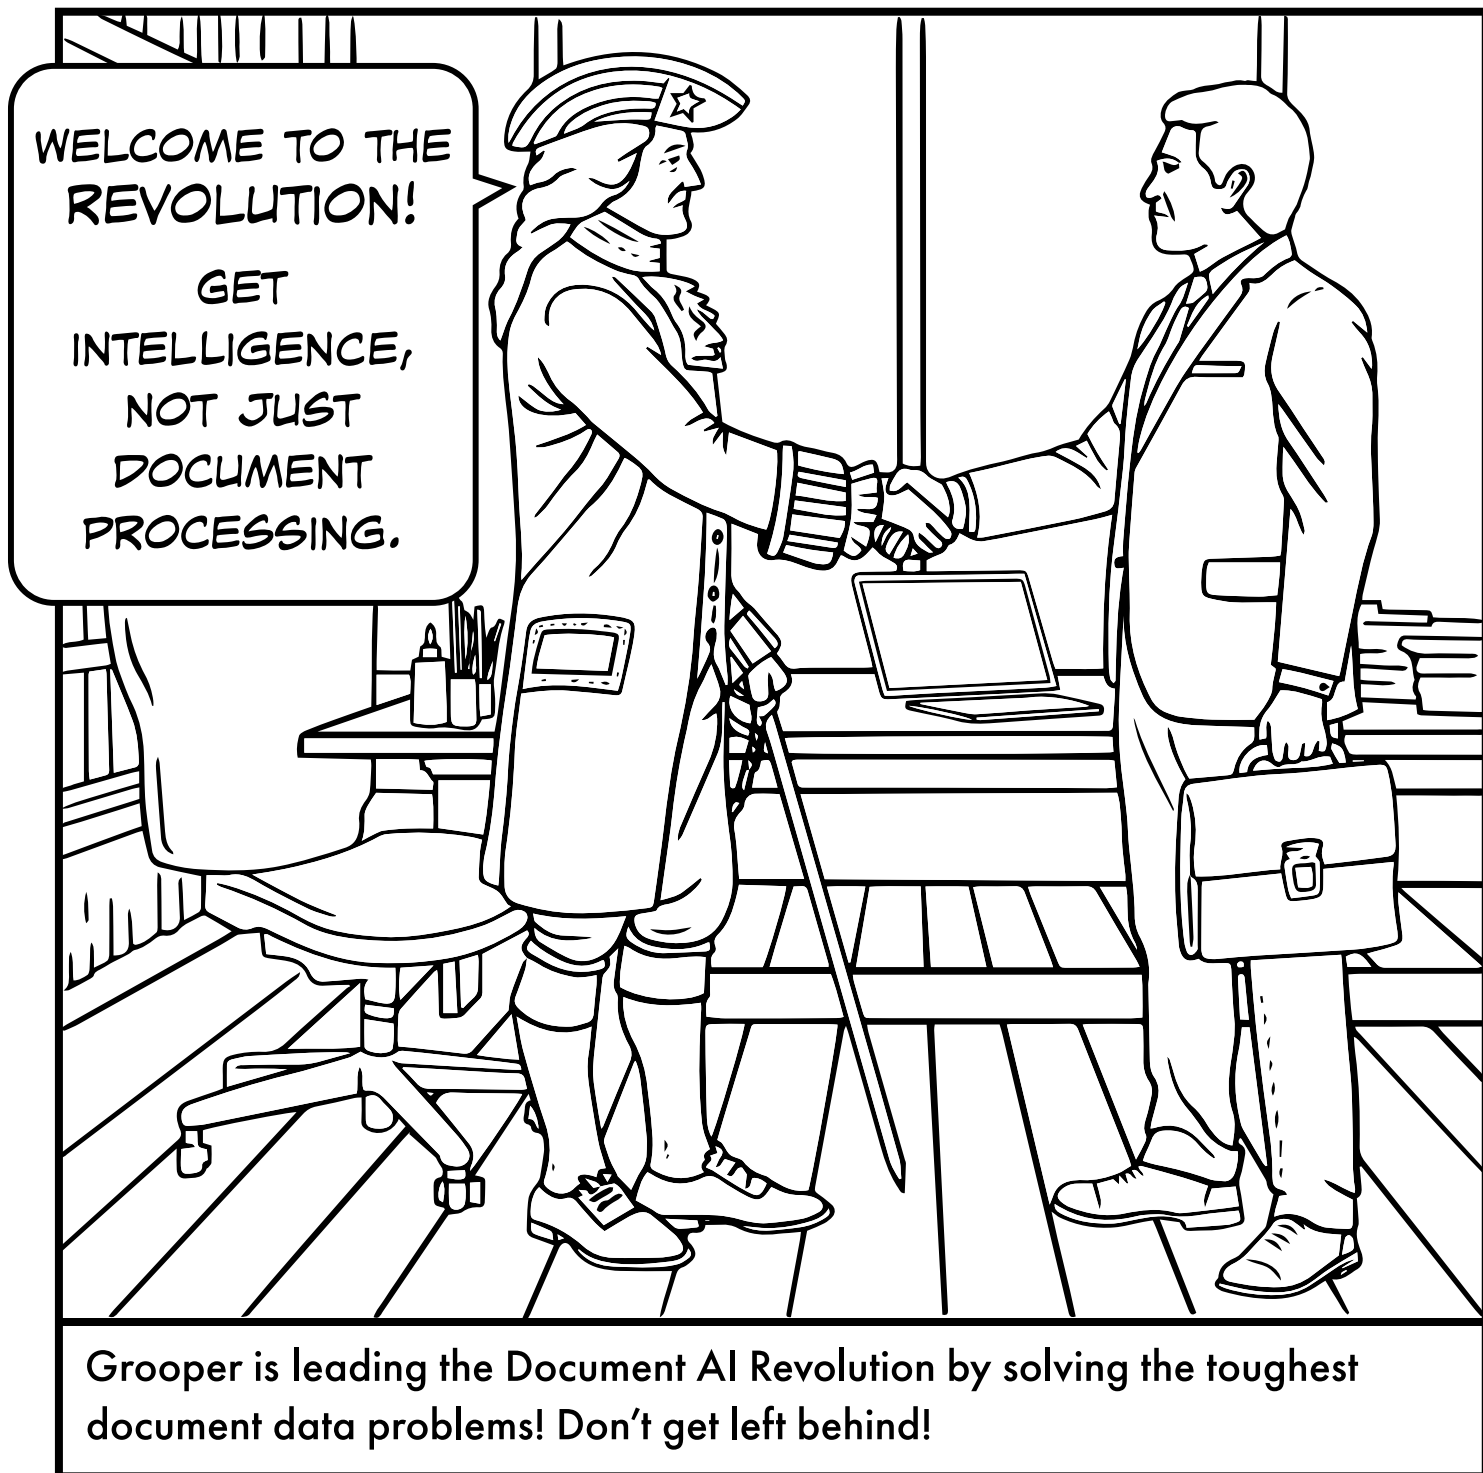

THESE PEOPLE ARE
STILL DOING TOO MUCH
DATA ENTRY...

Paul Revere finds a modern office that continually must do more with less. More documents, more sources of data, and more complicated business needs. But their legacy Document Processing solutions are slow and very limited.

So Paul spreads the hope that Grooper brings. Grooper was created out of frustration with those legacy Document Processing solutions. Today, thousands of users trust Grooper to process millions of pages with billions of data fields every day.
